

# Kentucky Derby Squares

10x10 Office Pool | Churchill Downs | Run for the Roses

Winning Horse - Post Position (last digit)

	0	1	2	3	4	5	6	7	8	9
0										
1										
2										
3										
4										
5										
6										
7										
8										
9										

## How to Play

1. Players pick squares and write their name or initials in any open box.
2. Once the grid is full, randomly draw digits 0-9 from a hat. Assign them across the top row first, then down the side column.
3. After the race, find the last digit of the winning horse's post position (top), and the last digit of the second-place horse's post position (side).
4. The square where those two digits meet is the winner. The winner takes the pot.
